A WEBLYTICA CO-BUILDING OFFER

Claude Skills for Your Team

A skill is a reusable playbook your AI follows: your process, your voice, your rules. **We build them with you and your team, on the AI you already use,** so the work comes out your way every time, no matter who asks.

HOW THE OFFER WORKS

1 Map the Work
We sit down with you and your team to find the tasks that eat the most time and follow the same pattern every week.

2 Build Three Skills in Month One
Together we create your first three skills: your process, your voice, and your rules, written so your AI follows them.

3 Put Them to Work
Your team uses the skills with the AI they already have. No new software to buy and nothing new to learn.

4 Add One New Skill Every Month
From month two we meet monthly, look at what the team needs right now, and build one new skill to meet it.

WHAT WE BUILD

Skills for Client Work

- Proposals and quotes drafted in your voice and your format
- Follow-up emails that sound like you wrote them
- Meeting notes turned into action items and next steps

Every skill is built from how your team already works.

Skills for Operations

- Standard procedures the AI walks any teammate through
- Weekly reports built the same way every time
- Onboarding guides that train new hires your way

Every skill stays yours: documented, reusable, and easy to update.

WHAT YOUR TEAM GETS

- ✓ Three working skills in your first month, built with your team
- ✓ Skills that run on the AI your team already uses
- ✓ One new skill every month, matched to what the team needs now
- ✓ Your know-how captured and owned by your business, not locked in one person's head

HOW SESSIONS WORK

Live working sessions with you and your team over screen share. **We build each skill together, test it on real work, and refine it until the team trusts it.** No coding background required.

Ready to Give Your Team Skills?

We build with you, not for you.
